

Theme Dynamics

It is important to think about the dynamics of themes — how talents from one theme interact with talents from another theme. Pick two of your top five themes and consider the effects those dynamics have on your role and relationships.

Gleaning Insights From Your Theme Dynamics

First, list the various theme combinations of your top five themes in the far-left column.

Then, using the Theme Dynamics Cards, look at the possible combinations for your first theme.

Choose a word from the "Who Am I?" side of the card that you feel best describes you.

Next, choose one adjective that you feel best describes you for each of the other four themes.

Keep in mind who you are and what words best describe you. If you don't see a word that fits, feel free to create your own.
